

## Dräger X-plore® 9000 and PAS X-plore® Airline System

The Dräger X-plore® 9000 series is designed for light duty industrial applications and provides comfortable and reliable respiratory protection. Thanks to such features as the unique safe-flow reducer and auto-test function, wearers can enjoy more operating convenience, safety and flexibility.

**Range comes with  
Safe-flow and Auto-test**  
Ensures correct airflow –  
no need for pre-testing by user

**Protected flow  
adjust mechanism**  
Provides additional airflow to  
the wearer for improved comfort

**Simple and easy connection**  
Compatible to standard Dräger  
professional facemasks or  
X-plore® 8000 headpieces

**Approved for the  
latest versions**  
EN14594 or EN14593  
(WWU as standard)

**Range of input coupling  
options to suit customer needs**  
Dräger CEJN (96 series)  
as standard options,  
other options available

## Benefits

---

### Always delivers the right amount of air

The X-plore® 9300 and 9500 devices cover an input pressure range of 3 – 10 bar, whereas the PAS X-plore has a range of 5 – 10 bar. Both models in the X-plore 9000 series come with the unique safe-flow pressure reducer and auto-test feature, which makes time-consuming pre-testing unnecessary. This special feature provides a continuous and sufficient amount of air to the wearer even if the external air supply pressure changes.

Additionally, these belt units include a protected flow-adjust to increase the airflow for added wearer comfort. For even more safety, a whistle warning unit sounds in case of insufficient air supply.

---

### Full compatibility for more selection

Like the Dräger X-plore 8000 unit, the Dräger X-plore 9300 range is compatible with a wide variety of headpieces and air hoses. These include constant flow long and short hoods, helmets and protective visors. This means you have more choice and can use the X-plore 9300 range with different headpieces according to your job and particular user preference.

The PAS X-plore devices are suitable for use with all Dräger lung demand valve facemask combinations as seen in the Dräger professional SCBA portfolio.

The X-plore 9500 is compatible with the Dräger FPS® 7000, Panorama® Nova and X-plore® 6300 range (Rd40 connector types).

Special features such as different waist belt options for welding and decontamination can be specified.

---

### Rugged, robust and simple to use

No matter which model you choose, you can count on a design that is built to handle even the toughest of jobs. Their user-friendly features such as the auto-test function mean that they require minimal training and are immediately ready for deployment. All versions are type tested as suitable for use in potentially explosive atmospheres.

---

### Cost effective maintenance

All models are simple regarding maintenance, easy to clean and have low cost replacement parts for heavily contaminated components. This not only saves time but money in that one does not require special cleaning.

## System Components

D-119071-2013

### Dräger X-plore® 8000 Hood

Dräger X-plore® 8000 hoods are available as a standard version or a premium version, and in short or long models. Using these hoods is advisable in all areas where additional head and eye protection is not mandated by regulations.

D-160-2017

### Dräger X-plore® 8000 Helmets and Visors

The Dräger X-plore® 8000 helmets and visors are particularly suitable for industrial environments in which head and eye protection is required. In addition to a protective visor and a helmet with a visor, the portfolio also includes a special visor for welders.

ST-7497-2005

### Dräger X-plore® 6000 Full-face mask

The Dräger X-plore® 6000 series is the most widely used full face mask series from professionals in a wide variety of applications. It meets the highest demands for quality, reliability, secure fit and comfort.

D-13666-2010

### Dräger FPS® 7000

The Dräger FPS® 7000 full-face mask series sets new standards in terms of safety and wearing comfort. Thanks to its enhanced ergonomics and the availability of multiple sizes, it offers a large, optimised field of vision and a very comfortable, secure fit.
